I want to thank you for helping Kole and myself yesterday with Annabelle. I wasn't ready to let her go, but I knew she was suffering. I grew up on a farm and raised horses, hunting dogs, chickens and even a few hard-headed goats. Back then, it was common to lose animals, plus we hunted and fished for food not for novelty. Although I am a pro animal rights activist, the world must have management of wildlife for healthy reproduction and safety. Personal pets were great, but because of the mentality of farm life, when they passed it was usually for different reasons. Like you, I was in an accident and broke my back, neck, left elbow, knees, and damaged an aortic valve. 8 surgeries later, 3 strokes... Annabelle was an intended therapy dog when we rescued her. It wasn't long when I realized she had rescued me. She was the bright light and the center of our family... She was very special to me.

Thank you so much for going above and beyond to help Anna, Kole, and myself. It was the most difficult loss I've ever experienced. She was the best gift and best friend. I will NEVER use another vet office as long as you are available. There are not enough words to describe my gratitude and personal thanks for the experience and time you have Kole and myself.

Dr. Klatt (Teresa), has cared for my adopted dog, Dusty, for over a year now. After adopting Dusty (a German Shepherd) it was evident that he had not been cared for properly during his younger growing years.

Dusty is approximately seven years old and during the past year Dr. Klatt has been a vital part of his veterinarian care. When I took Dusty as my own, Dr. Klatt administered all the veterinarian care that he should have received during his first year of growth. After careful examination and lab work, it was found that Dusty had several medical conditions (heart worms, diabetes, cataracts) that needed to be treated. Dr. Klatt has worked patiently with Dusty and I in order to get Dusty's health condition under control. While managing Dusty's diabetes and heartworms, Dr. Klatt is working with a Veterinarian Eye Specialist to evaluate Dusty's condition for cataract surgery.

In short, not only has Dr. Klatt treated Dusty for his medical needs but has taught me how to continue to manage his conditions for proper health. Not only are most all the services performed at the owners home, but are done timely and at reasonable costs. I am really happy that I was referred to Dr. Klatt for my dogs care and strongly

recommend her mobile vet care to pet owners who really need “in-home” professional pet care.

Dr. Klatt has provided my dogs veterinary care for approximately 6 years now. She has always put my dogs best interest first to ensure they receive the most appropriate services needed at all their ages. I have 4 dogs, all with varying needs and breeds. I have seen my share working with rescue groups. She works with them all.

Dr. Klatt looks for and offers alternative treatments and medicines and/or supplements where she felt it may be in the best interest of your pet and cost effectiveness for you, her client. Referrals to other vet specialists are also included if a situation reaches beyond her expertise in care. Even when those decisions occur she is very mindful in her choosing of the care needed and who would supply the right level of care for results needed and sought to make your furry family member happy and playful again.

I never hesitate to call her with questions between visits if I see changes occurring in any of my dogs and she always responds with the same care and concern since our first meeting.

Dr. Klatt is very dedicated about her purpose and care for her client’s and their pets. I would recommend her highly to anyone interested in finding a vet that will give you and your pets the most compassionate service and care for your pets life time.

I find Dr. Klatt a very capable and knowledgeable veterinarian. She has always made herself available anytime I have needed her.

I raise Yorkshire Terrier puppies, and through each of my dog's pregnancies, she has always provided thorough information and next steps with regards to the pregnancies. When the puppies arrived, she has always taken the time to educate me on next steps for the care of them. She consistently follows up to notify me when my dogs' exams and shots are due.

I would highly recommend her to anyone who is seeking veterinarian services.

Sincerely,

I have had Dr. Klatt look after my animals for many years and have found her to be a caring and intelligent caregiver who almost seems to look forward to seeing my kids every year.

I have quite a few cats and it is so convenient to have Dr. Klatt come for a visit and I am able to have 3,4,or 5 or more of my kids examined with that one vet visit. It saves me so much time and it is so less stressful to my kids as well. Once she has seen one all we have to do to set it down on the floor and... it is home again!

Many times I do not even leave work until I get her call to learn that she is now on her way to my her next stop which gives me time to get home, get the kids ready, and then let her in. So I do not have to miss much work either.

If you are considering a mobile pet veterinarian service I think it would be worth talking to Dr. klatt. I know I have recommended her to several of my friends and they too were very pleased and impressed with her knowledge and genuine caring about their animals.

I cannot imagine having a better vet for my dog. Terry has taken the best of care of my dogs and cats since 1998. She is extremely knowledgeable and compassionate. She is there for us whenever we need her. All of my pets look forward to seeing her. I had a

dog named Charlie that would lie on his back when he would see her walking toward him. My pets have needed specialists at times and she guided us to the best ones. Terry Klatt is the best.

Dr. Klatt is our mobile vet for our great dane. When she comes out she is always kind and very helpful!

Zena weighs about 155 pound. We have had her since she was six weeks old.

She has a Jeep she loved to ride in. But then Zena became afraid to jump into the Jeep or go up the steps to the house. We have hardwood floors and she was afraid of falling. We had placed a big piece of carpet in the kitchen.

Not being able to take Zena to the vet was a challenge until we found Dr. Teresa Klatt. Dr. Klatt came out and she was wonderful! She was very kind and patient with all of us.

After Dr. Klatt's examination of Zena, she told us that Zena was aging and was in pain from arthritis. Dr. Klatt gave Zena some medications that have made such a difference in the quality of her life. She will come up the stairs onto the deck and has become part of the family again. Yet, Zena will still not walk on the wood floors or jump into the Jeep.

They say animals can pick up on your feelings and emotions. Zena has taught us just how true that is... Our dear friend was sick and placed in the hospital. She was Zena's favorite friend. Little did we know how much Zena was feeling our sorrow and pain...

Our friend passed away. That night we put flowers and candles on our mantle. We prayed for her and her family. In silence, we heard something. It was Zena walking in on the wood floors where we were! She laid down and stayed until the candles burned out. She never has come back into that room after that night.

I would like to thank Dr. Klatt for helping Zena feel better and improving her quality of life. It's wonderful to be a family again.

I am sorry it has taken so long to send this to you. I want to thank you for taking such great care of Buddy, Misty Mae and Jesse and me for the last several years. You have a kind heart and we always saw that! (Five Star Review)

Dr. Klatt,

Thank you for all you do and constantly putting up with our craziness. Willow's quality of life has improved so much since we have met you. We look forward to your constant support in the years to come and maybe even more.

Dr. Klatt took time out of her busy weekend with an unpleasant situation when we felt we had nowhere else to turn. Dr. Klatt was very informative and compassionate with having to put our chocolate lab "Chocolate" down due to age and immobility. She made the process as smooth as possible. (Five Star Review)
