" I had arranged via e-mail for Dr. Klatt to come to have my senior adopted Dalmatian euthanized at our home due to a chronic and debilitating condition associated with her age. Almost all my friends, family, and acquaintances were shocked to learn that home euthanasia was an option. They all wanted to know how they could do this if ever needed.

Dr. Klatt was a very compassionate and kind person to meet me at our home on the day that I had asked for our Max. She was able to accommodate my wishes of having Max in our bed for me to hold him to let him go. I then had some final time with Max for myself and my other dog, Jekyll, to say our final goodbyes and take Max's body over to the crematory. Max's first and only owner had killed herself two years prior to this. Max had accepted this as his new forever home, and it was very important to me to not have to take him anywhere else to let him go... I loved Max for those two years with everything I had. Now, nearly three months later I still miss him so much. Our house is so quiet and empty without his grumps and growls...

Thank you for taking the time to drive to Mocksville to meet Max and help reunite his should with his first mom owner. What a great reunion for them. I will continue to share my experience of at-home euthanasia with pet moms and dads. Thanks again. "

Bearcha means little bear in Dutch, was never a dog we would’ve chosen had we realized what we were getting into! But underneath he was always just a sweet, scared feral little puppy. He never forgot a friend and it was wonderful to see how he accepted your care! He certainly enriched our lives, and we became quite the pack. Once the sedative began to take hold, she stepped back so that I could have the last few moments ‘in-private’ with Reece. He peacefully passed surrounded with his smells and in his home that he loved and guarded his whole life. What a blessing this was that I could be with him when he passed! I’m so grateful he didn’t have to go to a vet’s office surrounded by strangers, bright lights, loud noises and unfamiliar smells and surroundings in last last moments of his life.
